

THRIVEABILITY

WE ALL WANT TO REMAIN HEALTHY, GROW, AND PROSPER.
BOTH OUR GOVERNMENT AND OUR SURROUNDING CONDITIONS AFFECT THIS ABILITY TO THRIVE.

ALL GOVERNMENTS HAVE ONLY 3 FUNCTIONS:

1 REPAIR, MAINTAIN AND IMPROVE THRIVEABILITY CONDITIONS.

2 COLLECT TAXES TO FUND THRIVEABILITY BOLSTERING EFFORTS.

3 RELATE FUNCTIONS (1) AND (2)

When King George wanted only **HIS** thriveability conditons bolstered, the immigrants and their descendants in America withheld their permission from the arrangement.

WHEN KING GEORGE PERSISTED, WHAT WAS THE COLONISTS' UNIQUE RESPONSE?

“An agreement to mutually bolster fellow American thriveability conditons.”

THERE ARE ONLY 4 DIFFERENCES BETWEEN GOVERNMENTS:

1. WHOSE THRIVEABILITY CONDITIONS ARE BOLSTERED.

Broad condition bolstering allows everyone to contribute to a fair society’s by-products: prosperity, safety, trust, opportunity, and health as a proud identity. This is not Communism, nor Socialism. It’s the Great Potential of Broad Thriveability.

2. HOW BOLSTERING COSTS ARE SHARED.

Large wealth footprint individuals and entities have complex thriveability conditions that need to be repaired, maintained, or improved by government services.

(Ex.: Dept. of Defense maintains shipping and satellite communication conditions.)

They draw on condition bolstering with great variety, frequency, and volume.

Highly complex condition bolstering calls for an appropriately higher tax rate. Not because someone has more. Or makes more.

Higher rates offset their higher repair, maintenance, or improvement costs. This is what “**Paying one’s fair share**” means.

An inappropriately low tax rate for the largest wealth footprint individuals and entities simply shifts their highly complex condition bolstering costs onto lower complexity, smaller wealth footprint individuals and entities en mass. It also starves thriveability funding such that bolstering shrinks for the workforce that still pays the large wealth footprint’s share.

3. WHO DECIDES 1 & 2.

All authority and responsibility belong to WE THE PEOPLE. Therefore, we elect or become the responsible representatives who write (Legislature), enforce (Executive), and interpret (Judicial) the laws about thriveability condition

bolstering and cost sharing tax rates.

To not vote is to simply say, “I don’t care whether my thriveability conditions are repaired, maintained, or improved, nor whether the cost burden of complex or simple condition bolstering is unfairly shifted via inappropriate tax rates”.

In short, Voting matters.

4. WHETHER INFORMATION ABOUT 1, 2 AND 3 IS REVEALED.

News entities are a non-governmental, yet protected, part of the thriveability agreement. In service to the collective safety, trust and prosperity of all individuals and entities, they investigate, discover, point out, and comment on events, actions and decisions about bolstering efforts, effects, and skewing as well as attempts to shift tax burdens between complex and simple wealth footprint permission givers.
